

# H-8700RT Infrared Wireless Conference System Receiver

**Product ID:** H-8700RT

## Short Description

Receiving range around 150°

Operating distance > 12M

## Description

This IR wireless conference system transceiver adopts mounting hook for easy installation, can be installed on the wall or ceiling (option).

? Adop mounting hook installation, easy to install

? Wide-angle, receiving range is approximately 150 degrees

? Signal gain more than 35dBm

? Adopt low consumption electro circuit

## Specification

| Item                        | Parameter             |
|-----------------------------|-----------------------|
| Carrier Frequency Band      | 4MHz-8MHz             |
| Power Supply                | DC 24V from main unit |
| Rated Current               | 380mA                 |
| Receiving Sensitivity       | -100dBm               |
| Gain                        | 40dBm                 |
| Output Impedance            | 50?                   |
| Infrared Operating Distance | >12M                  |
| Terminal Type               | TNC                   |
| Dimension (mm)              | ?145x100              |
| Net Weight (Kg)             | 1.71                  |
