

CM12 6 Zone Remote Paging Microphone

Product ID: CM12

Short Description

6 zone remote paging
2 built-in bell signal
RJ45 connector

Description

CM12 is a multifunctional remote paging microphone, connected by CAT cable with main host, and between microphone and microphone.

Each microphone is able to control 6 partitions.

It is also possible to control any partition separately or to switch on and off any partition on one-key basis, showing a high extent of humanization.

Multistage expansion is supported.

- ? Level indication
- ? Up to 6 partitions under control
- ? 2 built-in bell signal
- ? Adjustable volume of microphone and bell

? RJ45 socket is used for connection between microphones, support cascading connection

Specification

Mic input sensitivity	10±2mV (unbalanced input)
Line input sensitivity	2±0.1V (balanced input)
Signal output	2±0.1V (balanced output)
Frequency response	Mic: 100Hz~15kHz (±3dB) Line: 20Hz~20kHz (±3dB)
Signal to noise ratio	Mic input ?60dB Line output ?70dB
Dimension of equipment (L×W×H mm)	232×146×68
Packing size (L×W×H mm)	282×200×264
Net weight	1.9kg
Gross weight	2.6kg
