

H-2400T 2.4G Wireless Conference System Antenna

Product ID: H-2400T

Short Description

Antenna panel used for wireless transmitting 2.4G signals

Description

This antenna need to be installed on the wall or ceiling which is unobtrusive height, facing the center of the hall (conference table).

It has the characteristics of directional receiving signal, the effective range of action is about 60 degree left and right, 30 degree up and down, and within 100 meters in front of the antenna. Try to keep all the microphone units within the scope of the antenna.

The antenna box should avoid Wi-Fi router or other devices that transmitting 2.4GHz signals.

Specification

Item	Parameter
Carrier Frequency	2.4G (2400-2483MHz)
Audio Channel	4 (1 Chairman + 3 Delegate)
Spread Spectrum	Spread Spectrum

Transmitting Power	<20dBm
Frequency response	50Hz-15KHz
Power Supply	230V/50Hz~60Hz
Consumption Rating	7W
Receiving sensitivity	-83dBm
S/N	95dB
Cable Type	LMR195 or SYV50-3(RG58)
Cable Length	10 meters (20m Max)
Dimensions (mm)	483 x 377 x 88, 2 U rack 19"
