

HS-1230 12 Inch 300W Outdoor All-Weather Compact Two-Way Coaxial Stadium Loudspeaker

Product ID: HS-1230

Short Description

Rated power: 300W

Line input: 8?

Speaker: 12" bass, 1" treble

PP + Barium shell, Aluminum mesh

Outdoor IP66 waterproof

Description

This 12 Inch 300W Outdoor IP66 All-Weather Resistant Two-Way Coaxial Full-Range Compact Stadium Loudspeaker is the perfect audio solution for outdoor venues and stadiums. Designed to withstand the elements and deliver exceptional sound quality, this loudspeaker combines power, durability, and versatility.

With its 12-inch woofer and 300W power handling capacity, this loudspeaker produces impressive bass response and clear, detailed audio across a wide frequency range. Whether you're hosting a sporting event, concert, or any outdoor gathering, this loudspeaker ensures that every note and beat are heard with precision.

The all-weather construction of this loudspeaker makes it ideal for outdoor installations. It is built to withstand harsh weather conditions, including rain, snow, heat, and humidity. The rugged enclosure is constructed from durable materials that provide excellent protection against UV rays, corrosion, and impact, ensuring long-lasting performance and reliability.

Featuring a two-way coaxial design, this loudspeaker provides a wide and even dispersion of sound, reaching every corner of your venue. The coaxial driver configuration ensures optimal phase coherence and smooth integration between the woofer and tweeter, resulting in a natural and balanced sound reproduction.

Installation is hassle-free, thanks to the included mounting hardware and multiple

mounting options. Whether you prefer to mount it on a pole, wall, or suspended from above, this loudspeaker offers flexible installation possibilities to suit your specific needs.

Designed for professional applications, this loudspeaker is perfect for stadiums, sports arenas, outdoor concerts, theme parks, and any other large outdoor spaces. It offers outstanding performance, durability, and weather resistance, ensuring that your audience enjoys an immersive and impactful audio experience.

Upgrade your outdoor audio system with our 12 Inch 300W Outdoor All-Weather Compact Full-Range Two-Way Coaxial Stadium Loudspeaker and enjoy high-quality sound that stands up to the challenges of any environment

Specification

Model	HS-1230	HS-1230T
