## Description

Introducing our **SUB-808 8 Inch 80W In-Ceiling Mount Subwoofer Speaker**, designed to deliver exceptional sound quality and powerful bass. Perfect for high-end background sound systems and home entertainment music systems, this subwoofer combines performance and elegance in a compact form, especially for built-in audio applications in stores, department stores, schools, offices, hotels and restaurants.

Simple structure, multiple power options, beautiful black coating and white mesh surface, stylish and compact appearance can be perfectly integrated with the modern interior decoration.

The panel is made of high-strength ABS material, and therear shell is made of metal technology.

The internal design of the robust and reliable system reflects the extraordinary bass effect, simple and convenient power settings, and easyoperation is suitable for a variety of occasions.

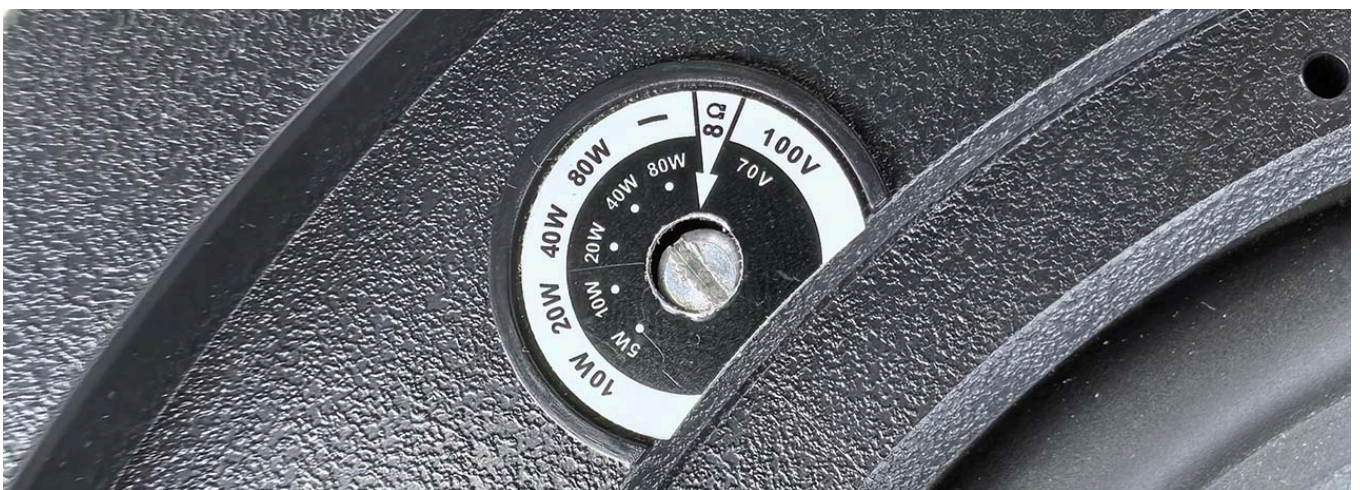

### **Key features:**

- **Powerful Audio Performance**

Equipped with an 8" woofer speaker driver unit and rubber surround for deep, rich bass and low-frequency response from 50Hz to 160Hz (-6dB).

- **Versatile Power Taps**

Features 10/20/40/80W power taps at 100V input and 5/10/20/40/80W power taps at 70V input, also support 8 Ohms input, allowing for flexible installation and optimal sound distribution.

- **Durable Construction**

Comes with a magnetic iron grille and slim edge design, along with an iron fireproof rear cover for added safety and durability.

- **Seamless Integration**

Designed for in-ceiling mounting, ensuring a sleek and unobtrusive installation that complements any décor.

Enhance your audio experience with the SUB-808, the ideal subwoofer for delivering high-quality sound in both residential and commercial settings.
