

# H-EVG05 HD High Speed Dome Camera

**Product ID:** H-EVG05

## Short Description

Ceiling mount & desktop

Horizontal resolution: 1080i

## Description

Ceiling mount & desktop

Horizontal resolution: 1080i

## Specification

| Item                    | Parameter                              |
|-------------------------|----------------------------------------|
| Image                   | 1/3.8 inch high quality HD CMOS sensor |
| Effective pixels        | 2000000 pixels                         |
| Horizontal resolution   | 1080i                                  |
| Signal format           | DVI/HDMI                               |
| Synchronization         | Internal / External                    |
| Video output            | CVBS: 1.0Vp-p/75?                      |
| Scanning frequency      | H: 15.625KHz / V: 50Hz                 |
| Lens                    | 10 optical , 4 digital zoom            |
| Minimum object distance | 10mm                                   |
| Viewing angle           | 5.1°(tele)-50°(wide)                   |

|                      |                                                                  |
|----------------------|------------------------------------------------------------------|
| Focus distance       | F=5.1-50, F=1.8-2.1                                              |
| Minimum illumination | 12Lux/0Lux                                                       |
| Gain                 | Auto/Manual                                                      |
| Focus                | Auto/Manual                                                      |
| SNR                  | >50dB                                                            |
| Shutter              | 1/2 to 10000 Auto/Manual                                         |
| Pan tilt             | 60 degree (Pan), 120 degree (Tilt)                               |
| Pan tilt speed       | 0.1°-180° (Pan), 0.1°-120° (Tilt)                                |
| Pan tilt mode        | Auto / Manual                                                    |
| Pan tilt orientation | Auto / Manual                                                    |
| Analog output        | VBS(RCA), Y/C(4P Mini DIN)                                       |
| Control interface    | RS-232/485, VISCA, PELCO P/D                                     |
| Baud rate            | 115200/9600/4800/2400bps                                         |
| Preset number        | 128 presets                                                      |
| HD format            | 1080P/25, 29.97; 1080i/50, 59.94;<br>720P/59.94, 50, 30, 25      |
| HDMI                 | HD-SDI digital; DVI (HDMI) digital;<br>Y,Pb, Pr (digital/analog) |
| Power                | AC110V-AC220V to DC12V/1.5A                                      |
